Dr. James B. Flak  
President  
Bell Telephone Laboratories, Inc.  
Murray Hill, New Jersey

Dear Jim:

Pete Scoville has told me of your decision to resign from Bill Webster's panel which has been reviewing the atomic energy intelligence situation for so many years. I am very sorry to hear of this for you have been a great help and given me confidence in our estimates in this highly technical, but very important field. I do understand your situation, however, but do hope that we can continue to call on you from time to time in an emergency even though you may not be actively participating in the activities of Bill Webster's panel.

With warmest personal regards.

Sincerely,

SIGNED

Allen W. Dulles  
Director

MEMORANDUM FOR: Director of Central Intelligence  
SUBJECT: Webster Panel Membership

1. Enclosed for your signature are letters to Dr. James B. Fisk, who is resigning from the Webster Panel, and Dr. James W. McRae, whom we are inviting to serve as a member of the Panel.
2. Dr. Fisk has indicated that, because of the press of his new duties as President of Bell Laboratories and his continuing activities with Dr. Killian's Science Advisory Committee, he is no longer able to serve as a member of Bill Webster's atomic energy panel. While we regret this, the facts are that he has been unable to spend any time with the panel this year and only a little time in the last year or so. Therefore, I believe that we must accept his resignation, but we will try and keep him on as a consultant on an ad hoc basis.
3. In discussing Dr. Fisk's replacement with Bill Webster, we agreed that Jim McRae would be an ideal choice. He was formerly President of Sandia Corporation where he knew the U. S. atomic energy weapons program inside out. He has also been on a large number of Defense Department R and D committees. He is now Vice President of AT&T. He is eminently qualified as a member of the Webster Panel. As you know, he also served on Hyland's Panel reviewing the ICBM program last fall and this will permit our using him on a more continuing basis.

HERBERT SCOVILLE, JR.  
Assistant Director  
Scientific Intelligence
